This PDF is a list of all the leaks and information about TribeTwelve that could be gathered from various sources. One is Scyne who helped work on TribeTwelve with Adam Rosner. Another source is a leak of Sebastian's journal, which was posted by Scyne. You can find a link for it at the bottom. A third source is a friend of mine who happened to be in a very good position with the creators of TribeTwelve.

Sebastian's journal:

It is a diary of a Nazi soldier that aqquired a peice of The Administrator's suit. The power the journal has comes entirely from that fabric. The fabric essentially causes a glitch in time and space that is so powerful that it can trap The Admin and the collective in a time loop. There was a leak of a draft for his journal, which the audience was eventually supposed to be able to see. The leak does not just contain information on Sebastian's journal, but notes on the series itself.

Sebastian's Journal leak:

The PDF document is 78 pages long. The following is a summary of it. The first page is about the Nazi experiment with The Administrator, A.K.A. The Incident. It is written from Sebastian's perspective. It also has notes on potential House of Leaves references. On page 2 there are several new characters that are introduced and described. After are more details on The incident, one being where the experiments take place, which is in an underground laboratory. This part of the document was going to be a preamble to Sebastian's journal. Sebastian started the journal as a way to write to his wife without worry of his letters to her being read by the German government. The next part is a slow build up as Sebastian interacts with the other guards. There are signs of The Admin's influence early on like how the dogs the soldiers were keeping went crazy, and how there are no animals in the black forest around the lab. This gets explained and mentioned multiple times throughout the document. Sebastian has nightmares, and one of them could possibly be a DarkHarvest00 reference on page 11 as it describes a cult-like group wearing masks. Another early sign is that all the meat from any animals they find or keep makes everyone who eats it sick. A character named Lars is taking pills and is seeing the doctors in the lab. On page 17 Severance is called "Odal". A quick google told me that odal is an "Elder Futhark rune (ᛟ)." Page 19 describes a play Sebastian is writing. He says he might name it "Tribe of Twelve", which could possibly be an explanation for the name of the series beyond what we were given. Sebastian then sees The Administrator in the forest and finds out about the locals ritual sacrifice of animals to the fairies in the forest, which is obviously The Administrator. This is also a reference to Slender's given origin which is a German forest fairy. Sebastian is given pills by the doctors but doesn't take them. He then has a nose bleed, which is a common symptom of The Admin's influence. Finn is one of the members of Sebastian's squad. Finn's girlfriend is found dead in the forest, her body and unborn baby mutilated. There is a period of happiness in the camp (which is unrelated to what happened to Finn) and Sebastian is given the comedy theatre mask by his friends. The scientists find out that Sebastion hasn't been taking the medicine and they try to force him to. Finn reveals that The Admin got into his head which is how he found out about his girlfriend, since he seemed to know about it before anyone else. The scientists capture The Administrator in a bell jar. The

entity escapes and Sebastian along with everyone else are sent out to look for The Admin, who soon enough is back in the jar and looks at one scientist in particular curiously. They raise and lower the temperature in the jar and one of the scientists studying the being gets affected by it while slender doesn't move or show any sign of discomfort. The Admin disappears again. After it is revealed that Lars, one of Sebastian's friends is "the conduit" and becomes Henka Visae, who later becomes Dead Head. Sebastian travels back in time in the lab. He goes back to the future and is told he has been missing for a week. The Administrator is once again back in the jar. More experiments are performed and each time the scientists are affected instead of the being. Lars went into the bell jar and cut off a piece of The Admin's suit, which later is given to Sebastian who puts it in the journal and gives the journal power. The suit scrap appears to be a normal piece of wool cloth. Due to the lack of results, the experiment is ended and the entity is supposed to be sent to secure containment elsewhere and everyone is supposed to be sent home, of course this doesn't happen and The Admin escapes and removes the organs of a scientist who later gets shot in the head. Another Nazi shoots themselves. They were then moved to the forest where more people were killed. Sebastian runs into the forest. "Sebastian murders Finn with the knife. The fatal wound needs to be a stab in the shoulder, so that foreshadows how I accidentally kill Edward later on." - taken from page 48. "I" must refer to Noah. Sebastian finds Finn in the woods, he shoots him and then stabs Finn in the shoulder. Sebastian finds another scientist in the woods. He gives Sebastian the cloth from The Administrator after Sebastian helps him. Sebastian finds Lars who is wearing a skull over his face, a clear Dead Head reference. Lars attacks him and Sebastian runs away after shooting him. The first 50 pages of the document is the unfinished journal, which is what I just described. The last 28 are things like notes about the journal and edits that need to be made, a story and notes about a character titled "Evan's notes". I'm assuming this"Evan" is Evan Jennings from the EMH series and it's about his character, who appears to be inhabited. The next part is "Adam's notes" which is notes Adam Rosner made for the journal and some edits of an entry. The next section is called "Milo's Journal". They are notes about how Milo's journal is supposed to be written and made, and there is one very interesting part on page 54: "Henka Visae is an anagram of Kevin Haas". This is a remnant of the original TribeTwelve ending, which was later rewritten. Inside Mary Ashers safe is a box with severance on it as well as her diary. In the notes of her diary Milo's dad, (Robert or Scriniarii) is called one of Slender's helpers or a proxy. What was supposed to be the final journal entries of Milo's journal is written and it also explains how Milo was supposed to be Observer, not Kevin which was another thing changed in the rewrite. The last entries of Milo's journal describe how he gets sent to the institute, doesn't take his pills so he is forced to get injections. He meets Michael/Patrick from MLanderson0. Patrick tells Milo to embrace what is happening, Michael tells Milo to do the opposite, to run. Milo later sneaks into Mary's car to the Order meetings after he leaves the institute. Milo is caught and they make him join the Order. The document then skips to 2004 where Mary has married John Fletcher and Milo is back on the pills. He visits Noah in 2008 and in 2009 Mary leaves John after she comes home with a knife. Mary's diary is described. Milo finds out that he was born just so Mary could get rid of The Admin. Mary catches Milo and leaves him in his room, taking the papers and her journal. Milo locks himself in his room and Mary eventually lures him out and drugs her son. He

wakes up in the woods where Mary slits his throat. Firebrand and Mr.Scars appear, as well as Scriniarii. Scriniarii slits Henka's throat as Mr.Scars covers Milo's throat wound. Firebrand covers his eyes. Milo wakes up in the abandoned house in the future where he kills Mary. He drives her body to a pond and a car drives up. Milo's dad walks out of the car and explains what happened to him. Robert drives his son home. Milo then dies on May 27th, 2010. The next part of the document is a timeline of the events in Milo's journal. After that there is a rewrite of TribeTwelve. In the end Sebastian goes to Karl's camp and gives him the journal. The next section is called "Kevin's tapes". Which is about how after Kevin goes missing Noah goes into his house and finds some CD's with severance on them. It is footage of him being stalked by the Observer who Kevin finds out is himself. Kevin is told by Noah that Milo died and reflects on his time with him in school in Alabama. Observer sends him a video and he acknowledges that he is being stalked. Strange things happen around his house and he eventually realizes the truth. In the end Kevin dies and the Observer takes over his body completely. Kevin dies when Observer goes after Noah who stabs him, killing Kevin in self-defence. The next part is a character timeline on page 74. It describes how Karl gets the journal from Sebastian in detail. It then goes on to describe Karl's life and history after. Karl mails Noah the journal and the Nazi knife after his health starts to deteriorate. Karl mentions how The Administrator can be stabbed by the knife covered in innocent blood as a weakness, which is the same knife Sebastian has and describes in his journal. Karl's body is reported missing after. The next part describes Mary's life. It goes into detail about the collective as the seven deadly sins and then what I'm assuming is an answer key of sorts for puzzles at the very end of the document.

Scyne's leak:

Scyne posted this on reddit:

Scyne 1 point · 11 hours ago · *edited 10 hours ago*

Yep, all true.

Milo's dad was saved by Firebrand and given the task of being the archivist, collecting data on the loop. To avoid influence he got the community to gather the data as you are "outside the loop looking in."

At the end, the reason why the loop was such a big fucking deal is that the loop is a closed time curve. It's a locked time line where the end causes the events of the beginning. FB and Scri have been recursively fighting to keep it stable because it's true purpose is paramount:

It's the Collective's prison and thus Slendy's holding cell.

By Maintaining the loop you help trap him into controlled set of events. Once his influence on the whole of time and space is under FB's thumb he is no more dangerous than a theme park ride, scary at parts but very safe as long as everything remains on the rails.

Also there are more symbols. Severance is just a single tool in the toolbox. The Pikachu of the TT Pokédex. If you can still watch the series and want to dig into the things I build, see if you can find them.

This leak confirms Robert as Scriniarii and gives us some insights into the loop.

The loop:

The whole loop construct is created by [REDACTED] with the help of Sebastian's journal. It is a closed time curve. The end causes the events of the beginning and the collective are trapped for all eternity in the timeline. The entire plot of Tribetwelve is essentially Firebrand trying to navigate Noah through the few minor alterations in the timeline whenever a new loop occurs as each one has small changes which can give the collective a chance to steal the journal. It just so happens that we're seeing the first successful one. The loop continues to exist only if Noah gets the journal and dies with it. The goal of the collective is to get the journal, which frees them and the Admin, who would basically continue to feed off of the world but the being would be allowed to spread to all corners of the Earth. The Observer in the loop we are seeing was created by Kevin dying in the previous loop. Kevin dies by getting stabbed by Noah in the previous loop, much like this one where this version of Kevin gets stabbed in deus ex machina. Scriniarii is important to the loop because he is saved by Firebrand and given the task of being the archivist, who collects data on the loop. He helps get the community to gather data because they are "outside the loop looking in". Scriniarii is also the roommate.

The symbols:

The other symbols were hidden in the patreon tiers:

Sensum $1 PER MONTH	Auxilium $5 PER MONTH

 Praesum **$10** PER MONTH	 **Inritatrix** Limited (0 remaining) **$50** PER MONTH

We all know about Severance which is an access key symbol which could be reverse engineered into a lock. There were supposed to be two other symbols that were going to be used. One was the time symbol and the other was the space symbol. The fourth symbol, Inritatrix is theorized to be representation of the audience. The time symbol, which I thorize to be Praesum is exactly what you think it would be, it allows people to travel through time. The space symbol, Auxilium is theorized to allow teleportation.

Mary Asher's safe:

The leak of Sebastian's journal has shown that it contains Mary's diary, but Adam Rosner said it contained some relevant information about Firebrand. Me and one of the sources of information I had to make this document both think the best explanation is another tool/symbol.

The End and the events leading up to The End:

Firebrand is inhabiting a dead vessel. Noah died when he was pushed off the tower in Pitfall. The next video after Facade was going to be about Noah escaping the boardwalk with Milo's journal only to get trapped in his house by the collective. Noah figures out the time symbol on accident after he runs out of food. He is sent to the black forest in 1945 and watches Karl shoot at The Administrator. The bullets get deflected through time and wind up killing someone in Noah's present. Because this is when Praesum is found, Auxilium was going to be the symbol in Mary's safe, if that theory is true. The video after Noah discoveres Praesum would be him erasing severance from Milo's journal and unlocking it, killing the remains of Milo Asher in the process.This is where season 2 would have ended. Season 3 starts with the beginning of the dark time and the start of Noah's decline into Prebrand. Prebrand figures out how to use Praesum and goes back in time to catch birds to eat, which is where the raw bird came from in Sisyphus. Prebrand is then mailed the journal after Karl's health starts to deteriorate and he realizes he won't live for much longer. Then Observer attacks him and Preband stabs Observer, which kills Kevin. Karl dies and Preband finds the journal, the ammunition box, and a letter from

Karl after. Prebrand then goes on a journey, traveling through time to visit his younger self. There are certain scenes spread out in the videos where you can see shadows of figures which are just off screen. The figure in them is Prebrand, who is traveling back to steal batteries from Noah which is how his laptop is charged. There was also going to be scenes where we would see past Noah filming on Prebrands camera. Prebrand becomes Firebrand eventually and there was a planned crossover of HABIT training him for the ending, which was going to be a fight between Firebrand and The Administrator. The fight would have "scaled several dimensions and times in space" and the very end itself was going to be Firebrand winning against The Administrator and severing himself from the collective, which he probably would have done by stabbing him with the Nazi blade with innocent blood on it, which was going to be Kevins. The Admin however, would not be destroyed, just defeated. The collective would not get destroyed either.

Extra information:

Edward, the tech guy from the device analysis video was supposed to be the most significant character in the series according to Adam Rosner. He was going to be stabbed in the shoulder, which is foreshadowed in Sebastian's journal. Edward was supposed to get sent back in time to fix a German radio. Kevin's log, which is described in the journal leak, was going to have its bloopers be a DVD extra. There were also plans for a bound copy of Milo's journal. Henka Visae *(probably)* died in the boat incident. Another thing to note is that the leak of Sebastian's journal was the most recent thing Scyne had access to. Everything else that was not covered by that leak was from what he remembered was going to happen.
